This is to confirm your pet's scheduled appointment on \_\_\_\_\_,  
and to provide information about the upcoming procedure.

Enclosed you will find an Anesthesia/Treatment Release form. Please read and complete this form, and bring it with you when you drop your pet off for surgery. Pre-anesthetic blood work gives the doctor an inside look at some of your pet's vital organs. We are especially concerned with the health of the liver and kidneys as these organs help the body metabolize the medications used during surgery. We complete this simple blood work to help ensure the safety of your pet. Fluid administration during surgery helps keeps your pet's blood pressure at normal levels and provides immediate access to a vein if emergency medication is necessary. If you have any questions regarding this form, please feel free to call us.

#### PRE-SURGERY CHECKLIST

- ❖ Remove all food after 10 p.m. the night before your pet's procedure; Water is OK.
- ❖ Read, complete and sign the Surgery Release/Anesthesia Form
- ❖ Check in between 7:30 - 8:30 a.m the day of surgery. Plan to pick up your pet between 3 - 4 pm the same day.
- ❖ Give lots of extra pats and kisses!

Your pet's surgery is scheduled with Dr. Gibson
